

COSC 122: Computer Fluency

Survey Results (N=99): Year of Study

Survey Results (N=99): Major

Survey Results (N=99): Topics of Interest

Forming Groups

- Goal: Mix students with different backgrounds and experience
- Students from different majors go to 4 different parts of the classroom

Forming Groups

- Goal: Mix students with different backgrounds and experience
- Students from different majors go to 4 different parts of the classroom
- You will be given a number (1-20): Remember your number

Forming Groups

- Goal: Mix students with different backgrounds and experience
- Students from different majors go to 4 different parts of the classroom
- You will be given a number (1-20): Remember your number
- Get your stuff and sit in your group (Fridays only)

Connection before Content

- Take 1 minute to reflect and identify 3 things you look forward to this year
- Share 1 of those items with rest of your group
- Follow-up discussion:
 - Did you come up with something similar?
 - Are you curious about what was said?
 - etc.

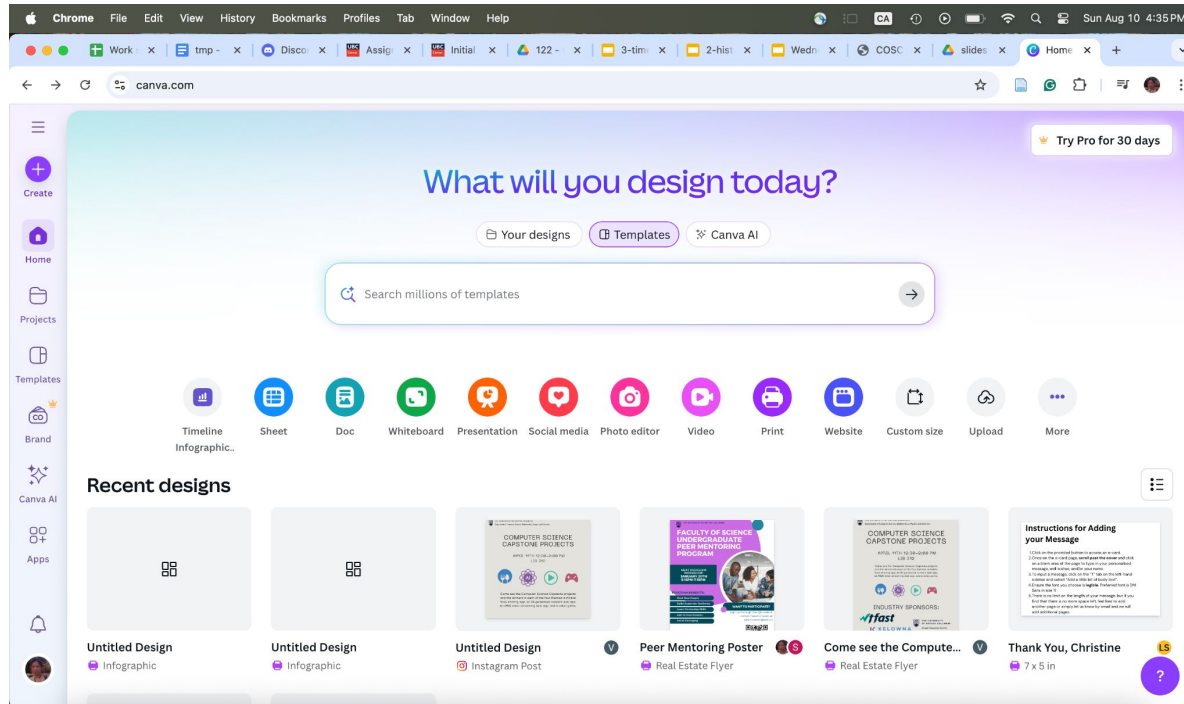

In-Class Activity #1

- Pick historical computing events
 - See details in later slide
- Create an infographic to make a timeline for those events
 - Find a free online tool to build timeline collaboratively
 - Example: [Canva.com](https://www.canva.com) – create free account
- Submit completed timeline on Canvas

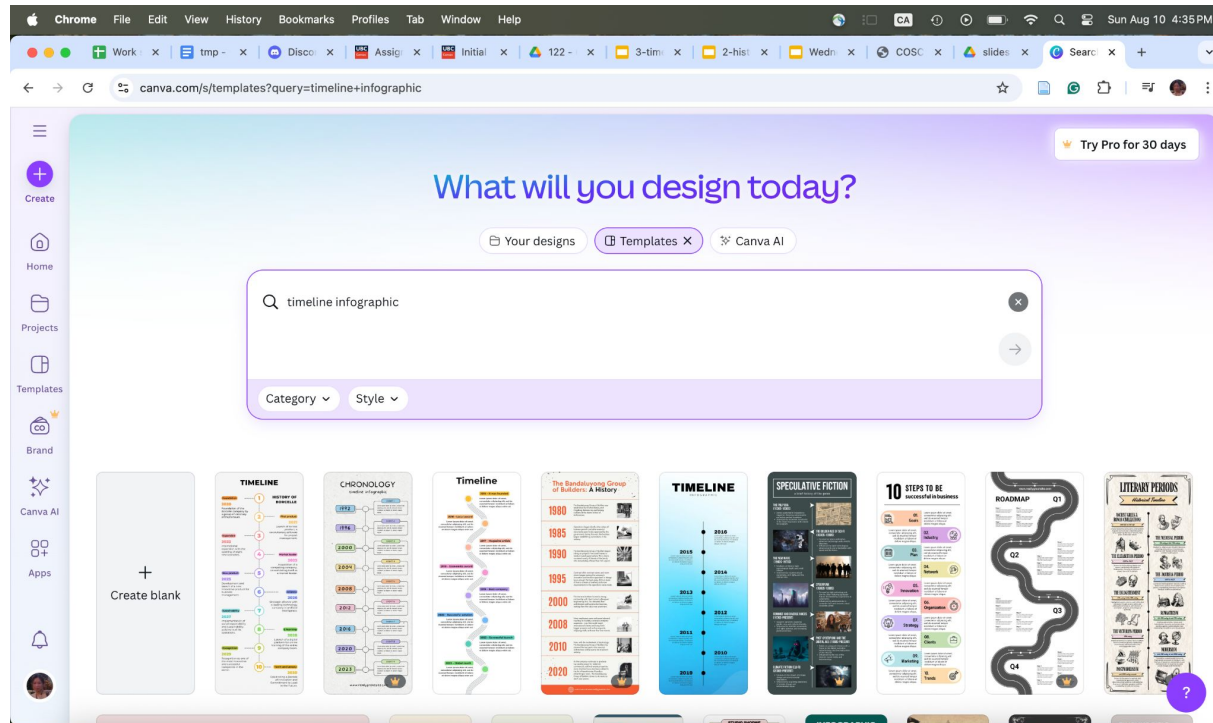

Getting Started on Canva

- Go to canva.com

What and When?

Definition
+ Year Invented

- The Abacus
- Google
- Personal computer
- iPhone
- Leibniz's stepped reckoner
- Ubiquitous computing
- The Turing machine
- Computers using transistors
- The Bombe (encryption)
- Amazon
- ARPANET
- Pascal's pascaline
- Central Processing Unit
- Yahoo!
- Internet of Things
- Internet
- ENIAC (required rewiring)
- Babbage's difference engine
- Graphical user interface
- Hollerith's automated solution
- Social computing
- Assembly
- World Wide Web
- Computers using vacuum tube
- Palm Pilot
- Mobile computing
- Babbage's analytical engine
- ChatGPT
- FORTRAN
- Lovelace's first algorithm

When You Are Done

- Ensure all 30 things/events:
 - Have a year of invention (maybe over multiple years)
 - Have a definition describing the object or business and what it is known for
 - Are listed in chronological order
- Double-check each other's work
- Add team number and everyone's names onto the image (no student numbers needed)
- Share → Download as PDF document
- Submit timeline to group activity on Canvas
